## Builder's Background

Delbert Henry started as a welder/machinist in the Air Force at age 18 and managed to transfer his skills into the world of custom aluminum boats. Since opening his own shop in 2011, he has been involved with the fabrication 8' to 80' hulls (PWC, Jet Boats, Skiffs, Bow Pickers, and Landing Craft). Del's passion for custom aluminum boats has lead to many clever innovations and a quality hard to find at these prices!
